## SUMMARY

---

Software Engineering student with hands-on experience in backend and full-stack application development using Java, Spring Boot, Angular, and RESTful APIs. Skilled in developing and enhancing enterprise applications, implementing business logic, integrating APIs, and performing software testing. Familiar with financial systems, multilingual content delivery, performance testing, and Agile development practices. Strong problem-solving abilities with a solid foundation in software engineering principles and software development lifecycle processes. Willing to find opportunities to further apply and grow these skills in a professional software engineering role.

## EDUCATION

---

### Tunku Abdul Rahman University of Management and Technology

*Bachelor of Computer Science in Software Engineering (Honors)*

**Kuala Lumpur, Malaysia**

07/2024 – 07/2026

- GPA: 3.90 / 4.0

### Tunku Abdul Rahman University of Management and Technology

*Diploma in Computer Science*

**Kuala Lumpur, Malaysia**

06/2022 – 06/2024

- GPA: 3.85 / 4.0

## SKILLS & TOOLS

---

**Languages:** Mandarin, Bahasa Melayu, English

**Programming Languages:** Java, Angular, Spring Boot, HTML/CSS/JavaScript, RESTful APIs, MySQL

**Tools:** Git/GitLab, Jenkins, Postman, WordPress

## EXPERIENCE

---

### iFAST Global Hub AI Sdn. Bhd.

*Intern, IT Partnership*

**Kuala Lumpur, Malaysia**

01/2026 – 07/2026

- Implemented backend business logic and database optimizations for financial modules including PnL calculations and dividend processing.
- Built a consolidated summary panel for users to view margin accrued interest and repayment amounts.
- Implemented transaction controls for cash withdrawal and transfer blocking on margin accounts under certain conditions.
- Built a trust account data enquiry module for back office users.
- Designed and integrated REST APIs and AI Translation APIs to support financial services and multilingual content delivery.
- Conducted testing (Unit, Functional, Regression, UAT) and resolved production issues across UI, API, and transaction workflows.
- Used Grafana to run k6 reports for API performance testing, and supported deployments through Jenkins and GitLab CI/CD pipelines.

### EasyPro Sdn Bhd

*Internship*

**Kuala Lumpur, Malaysia**

11/2023 – 02/2024

- Developed mail merge automation solutions for legal industry clients.
- Built dynamic report generation functionality to improve reporting efficiency and accuracy.
- Customized and maintained WordPress websites according to client requirements.

## PERSONAL PROJECTS

---

### Vision-Based Smart Retail Billing System (Final Year Project)

*IoT, Web & Mobile-Based System – YOLOv8, Flask, AWS S3, DynamoDB, AWS SageMaker*

- Developed an AI-powered smart retail billing system using a custom-trained YOLOv8 model for real-time product detection, with Flask, AWS S3, and DynamoDB for backend and data management.
- Implemented automated product recognition, dynamic pricing, and secure cloud-based data management.
- Built a dataset labeling and model training pipeline using AWS SageMaker to support continuous dataset preparation and model retraining.

### **Blindmate**

*Mobile App – Kotlin, Firebase Storage, Gemini API*

- Built a random-matching chat app targeted at individuals with mental health challenges, encouraging them to build confidence in making friends and engaging socially.
- Designed a random chatroom with real-time content monitoring by integrating the Gemini API with custom prompts to detect and filter rude or inappropriate messages.
- Developed additional engagement features including an anonymous content-sharing space, mini-games, and other community tools using Kotlin and Firebase.
